

Dear ,

When you look back at 2021, what kind of a difference do you want to say you made? It's a hard question, right?

In 2020, all you had to do was pick a cause and do something - anything - and you were all but guaranteed to help.

That's one reason why so many people like you gave to Human-I-T when the effects of the digital divide were on display in full force last year. Your generosity meant that help was waiting for the scores of people who turned to Human-I-T to stay connected in 2020.

In fact, generosity from people like you is what enabled us to ensure over 50,000 public school students could excel in and out of the classroom with technical support. It's why we were able to connect tens of thousands of households across the country with low-cost internet.

This year, though, things are different. Undeniably.

What stands out for me in 2021 isn't the hardship everywhere -- **it's how people are finding new opportunities to continue**

that spirit of support that was established last year, .

That spirit of community is crucial today, so we've set a goal of raising \$5,000 for Giving Tuesday tomorrow. With so many underserved families coming to Human-I-T for help right now, nearly two years after the pandemic started, this campaign is especially important.

No matter what difficulties families are facing, Human-I-T is here to make sure they have the devices, internet, technical help, and digital literacy they need to unlock their potential in the digital age.

But this holistic support isn't possible without people like you.

For a gift of \$30, you can give a working, single parent one hour of personal technical support. That support could mean helping fix a computer issue to apply for a better-paying job, access affordable housing, or get on a telehealth call with a therapist.

Let's make 2022 a brighter year for those who need it most.
